Creating a better tomorrow

CursorEdit Sample Document

This is a sample PDF you can use to try out CursorEdit, our free browser-based PDF editor. Every word on this page is real, selectable text embedded in the PDF, not a flattened image or scanned page. That means you can click directly on this paragraph inside CursorEdit and edit it in place, just like a word processor.

What you can try on this file

- Edit this paragraph's text directly on the page
- Highlight, underline, or strike through any sentence
- Add a new text box, image, or signature
- Apply a watermark across both pages
- Merge in another PDF or delete a page
- Fill out the sample form field below

Tip: Everything happens locally in your browser. This file is never uploaded to any server while you edit it.

Sample Form & Notes

The section below mimics a simple intake form. Try selecting the field labels and typing your own answers next to them using the Select / Edit text tool in CursorEdit.

Name: _____

Company: _____

Email: _____

Date: _____

About Cookies & Cursor Technologies

Cookies & Cursor Technologies builds custom software, websites, and mobile apps for schools, advocates, and poultry farms across India. Based in Muzaffarpur, Bihar, the team also ships free browser-based tools like CursorEdit for freelancers and small businesses worldwide.
